NJABULO MKHUNGO

Junior AI Developer | Business Applications

Mowbray, Cape Town | +27 84 726 0180 | njabulocharismkhungo@gmail.com

Portfolio: njabulomkhungoportfolio.netlify.app

Professional Summary

Junior developer at Forvis Mazars (training and supervised software and AI projects) with experience in JavaScript, React, Node.js, Python and SQL. Previously built responsive dashboard interfaces for an energy data portal at IntelliNest, working in a sprint-based team, and worked with SQL databases and data pipelines at CAPACITI. Currently completing a BSc in Computing.

Skills

- **Development:** JavaScript/TypeScript, React, Node.js, Python
- **Databases:** SQL, MongoDB, Firebase Firestore
- **Web:** HTML, CSS, Tailwind CSS, REST APIs, Vite
- **Tools:** Git, GitHub
- **Data:** Data visualisation, data cleaning, data governance and quality, Power BI, Excel
- **Learning:** OutSystems, Power Automate, Copilot Studio; ChatGPT for coding support and troubleshooting

Work Experience

AI Software Developer (Trainee) | Forvis Mazars | September 2026 - Present

- Completing training in AI and software development alongside supervised software and AI projects.
- Applying training to practical development tasks under guidance in a professional environment.

Frontend Dashboard Developer | IntelliNest | January 2026 - June 2026

- Built responsive dashboard interfaces and data visualisations for a user portal for energy data.

- Collaborated with the development team through sprint planning, task allocation and team discussions.

Data Analyst Associate | CAPACITI, Cape Town | 2025 - 2026

- Captured, processed and reported on data using SQL, Excel and Power BI.
- Worked with databases and data pipelines, applying data governance and quality principles to real datasets.

Invoicing Team Member | We Buy Cars (Pty) Ltd, Durban | 2023 - 2025

- Processed invoices and transaction documentation accurately under deadline pressure.
- Resolved client queries and maintained accurate records.

Projects

Taxi Pay Platform | React, Node.js, MongoDB, Stripe API

- Built a digital payment platform for taxi commuters with tracking, Stripe payments integration and a database-backed booking system.

E-Commerce Website | React 19, React Router v7, Tailwind CSS, Firebase Firestore and Storage, Vite

- Developing a responsive store with product images, sizes, stock tracking, a shopping cart and checkout. Payment integration is still in progress.
- Investigated and fixed product image upload and display issues in Firebase Storage.

CrimeStats SA | HTML, CSS, JavaScript

- Built an interactive dashboard for exploring crime trends and categories across South Africa from public data.

MICT SETA Dashboard | HTML, CSS, JavaScript

- Built an interactive dashboard that turns candidate score sheets into a clear, explorable report.

Education

BSc in Computing | University of South Africa | 2025 - Expected completion 2027

BSc in Environmental Science | University of KwaZulu-Natal | 2021 - 2024

CompTIA Data+ | CompTIA | October 2025
